

**Kalirel,  
the brand  
of an industrial  
group**

**An industrial equipment of great scale**

- More than 20 000 square meters on 2 factories in the French Burgundy (Chagny and Mâcon)
- 5 000 radiators per day capacity
- High level of automation.

**An advanced research and development policy**

- Integrated mechanical and electronic engineering and design departments
- Certification and development centre.

**The insurance of a high level of quality and reliability**

- Guarantee of a systematic quality control at each stage of the production
- Unique integrated manufacturing process: from the steel reel to the piloting system plastic mouldings to the finished product
- Dedicated and perfectly controlled logistics and sales administration.

**The biggest customers have already trusted Kalirel**

Thanks to our high performance industrial equipment, the quality of our products, our network coverage and our technology control we have already appealed to the greatest. Our radiators are the leaders in projects throughout Europe.

**What is the best heating system: comparison**

	Gas	Oil	Electric storage	Convactor/Radiant	Kalirel
Installation work	pipes, meter, network connection, boiler	pipes, meter, network connection, boiler	wiring	wiring	wiring
Installation time	several days	several days	immediate	immediate	immediate
Installation costs	-	--	-	+	+
Nuisance	boiler noise	boiler noise, oil storage	heaters size and weight	dirt on grid, dry heat	none
Maintenance service	yearly visit	yearly visit	none	none	none
Energy cost	-	--	+	+	+
Heat quality	good	good	bad	bad	good
Radiator individuel control and piloting	no	no	no	no	yes

**Kalirel**

Thermodynamic fluid filled electric radiators,  
towel rails and piloting systems

**Kalirel**  
The cuddly heating

COMPLY WITH THE ENERGY EFFICIENCY REQUIREMENTS IN THE BUILDING REGULATIONS PART L 1 AND 2.

## Kalirel electric radiators

- Each Kalirel electric radiator works independently, providing the right amount of heat for each room where it is installed. Very easy to install, it's therefore cheap to add a Kalirel radiator to any heating system.
- The steel or aluminium heating body contributes to the best heat exchange like a normal wet central heating but without any pipes. It also allows you to choose the aesthetic design that fits you best.
- The thermodynamic fluid, especially designed for Kalirel, favours optimum circulation and quickly diffuses heat on all the exchange surface of the radiator. Its components also contribute to the permanent "hot point" effect.

### 2 options to suit your needs: the Cyclope® radio controlled system and the Classic range

Kalirel electric radiators are available in 2 versions:

- With the Cyclope® radio controlled range you can pilot your overall heating installation from your sofa. You are able to set the accurate temperature of the room from the Radio Control onto the radiator. The set temperature on the Kalirel Cyclope® radiator is accurately shown in half a degree centigrade. Kalirel Cyclope® radiators can be piloted with the unique Cyclope® radio control, which is full of worthy features and very easy to use.
  - The Classic range is equipped with an electronic thermostat that can work either as a stand alone and can be programmed with a pilot wire timer.
- Both ranges of electric radiators are equipped with a lockable thermostat thanks to the Kalirel electromagnetic key delivered with each radiator.

## Steel

### Systéla range

- 3 possible heights: 400, 600 and 900 mm
- 2 widths available: 50 mm (simple panel) and 80 mm (double panel)
- 7 outputs from 500 to 2000 W.

## Aluminium

### Ambelia range

- 6 outputs available: from 750 to 2000 W.

### Java range

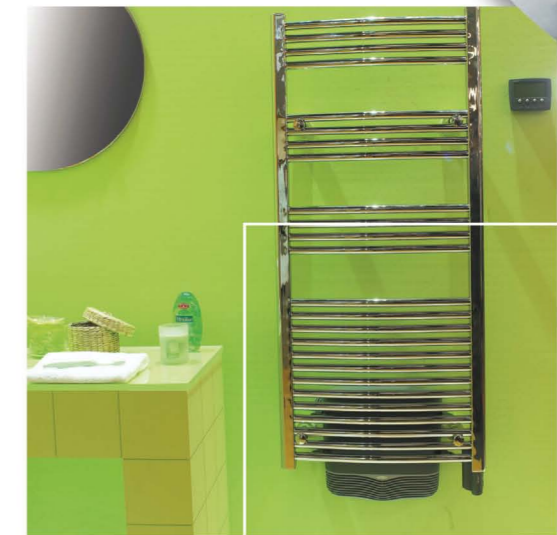

- 2 possible heights: 430 and 580 mm
- 8 outputs available: from 500 to 2000 W.

## Thermodynamic fluid filled electric towel rails

Kalirel is launching a complete comprehensive range of electric towel rails to fit all the Bathroom and Kitchens. Featuring the same advantages of the radiator range, Kalirel offers 4 different designs incorporating 3 electrical options.

### 3 electrical options to suit your needs:

- The Classic range: The Classic range is equipped with an electronic thermostat that can work as stand alone and can be programmed with a pilot wire timer.
- The control unit of the towel rail can be installed anywhere in the bathroom for a better use of your towel rail. The Cyclope® radio controlled system can be piloted with the unique Cyclope® radio control, full of worthy features and very easy to use.
- Feunn integrated fan heater solution: for faster, temporary temperature increases, Kalirel offers you towel rails with the Feunn integrated fan heater.

Kalirel, all the ideal comfort advantages

Kalirel, all the ideal comfort advantages

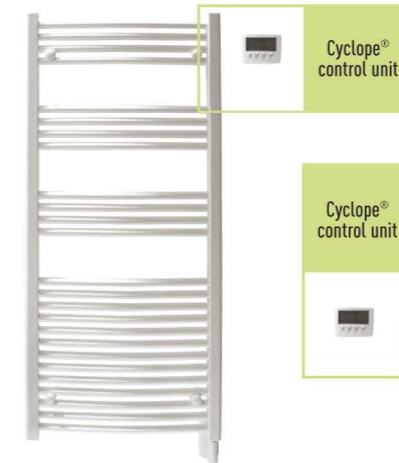

### Kéra

- Chrome and curved design, a must have.
- Available in, 300, 500 and 750W, and in Classic, Cyclope or in Feunn versions.

### Talia

- Economy range, sober design offering all the advantages of a towel rail
- Available in 500,750 and 1000 W
- Equipped with a Classic thermostat

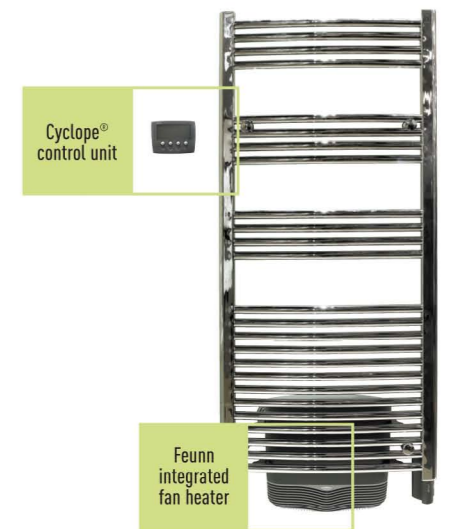

### Mahé

- Improved, curved design all in rounded shapes, the ideal touch
- Available in 500, 750 and 1000 W, and in Classic, Cyclope or in Feunn versions

### Tiaré

- Well-off design with large flat and curved tubes.
- Available in 500, 750 and 1000 W, and in Classic, Cyclope or in Feunn versions.

## Kalirel Cyclope® radio control system

Unique technology for unique comfort in 6 main features

### 1 EasyPilot™

Designed as a mobile phone, as easy to programme, control and pilot.

### 2 TSC by Kalirel™

Secured transmission and feedback thanks to the ZigBee communication protocol.

### 3 OptiPower™

You can optimize your heating power supply and save money from your electricity contract.

### 4 EnergyControl™

You can easily check your electricity consumption in each room!

### 5 15 Kalirel radiators

can be individually piloted in 4 zones with one Cyclope® Radio Control.

### 6 Each radiator is lockable

from the Cyclope® Radio Control.
